

AP Biology Summer Assignment 2018/2019

The summer assignment for AP Biology is designed to help you review the foundational information you will need as we begin our primary content in the fall. AP Biology builds on information learned during 9th grade biology, as well as concepts learned in chemistry. The summer assignment should ensure you have a firm grasp on these concepts entering AP Biology in August.

For your assignment, you should access the Open Stax AP Biology text online at openstax.org. You can follow the links on the homepage or use the following link <https://openstax.org/details/books/biology-ap-courses>. You can view this material online or download the book for free. Read and take notes over Unit One which encompasses the first three chapters of the book and be prepared for a test the first week of school over the information. Please let me know if you have any questions or difficulty accessing the information.
